Décret

EA Approval
En 407 C.P.

On the recommendation of the undersigned, the Lieutenant Governor, by and with the advice and concurrence of the Executive Council, orders that:

Sur la recommandation du soussigné, le lieutenant-gouverneur, sur l'avis et avec le consentement du Conseil des ministres, décrète ce qui suit :

WHEREAS section 9 of the *Environmental Assessment Act* provides that the Minister of Environment and Energy, with the approval of the Lieutenant Governor in Council, may give approval to proceed with an undertaking, give approval to proceed with an undertaking subject to such conditions as the Minister considers necessary, or refuse to give approval to proceed with the undertaking;

WHEREAS under subsection 12.4(3) of the Act the Minister has ordered that section 9 (other than paragraph 9(2)2 and the reference to subsection 6.4(2) in paragraph 9(2)5) as enacted by the *Environmental Assessment and Consultation Improvement Act, 1996*, apply with respect to the environmental assessment;

WHEREAS 13 notices requiring a hearing were received by the Minister of the Environment after the publication of the Notice of Completion of the Review; and

WHEREAS, having considered the purpose of the Act, the environmental assessment of the undertaking, which is the subject of the attached notice, and the submissions received, the undersigned Minister of the Environment considers that a hearing is unnecessary and is of the opinion that the undertaking should be given approval to proceed, subject to the conditions specified in the attached notice,

THEREFORE, pursuant to the provisions of the *Environmental Assessment Act*, the undertaking which is the subject of the attached notice, be given approval to proceed subject to the said conditions.

ENVIRONMENTAL ASSESSMENT ACT

SECTION 9

NOTICE OF APPROVAL TO PROCEED WITH THE UNDERTAKING
(AND ORDER UNDER SUBSECTION 12.4(3))

RE: An Environmental Assessment for Highway 407 Transitway
(Markham Road Easterly to Highway 7 East of Brock Road)

Proponent: Ministry of Transportation

EA File No.: TC-CE-02

TAKE NOTICE that the period for requiring a hearing, provided for in the Notice of Completion of the Review for the above noted undertaking, expired on February 16, 1998. I received 31 submissions before the expiration date. Eighteen submissions required a hearing by the Environmental Assessment Board. The public, including the submitters, has been advised that the Minister was considering applying section 9 of the Act with respect to the Environmental Assessment (which has the effect of eliminating the acceptance decision which was necessary prior to January 1, 1997) and were invited to make submissions on that proposal. None did.

Pursuant to subsection 12.4(3) of the amended Environmental Assessment Act I order that the provisions of section 9 (other than paragraph 9(2)2 and other than the reference to subsection 6.4(2) in paragraph 9(2)5) apply with respect to the Environmental Assessment.

I do not consider it advisable or necessary to hold a hearing. Having considered the purpose of the Act, the Environmental Assessment, the Review and submissions received, I hereby give approval to proceed with the undertaking, subject to conditions set out in Attachment A.

REASONS:

My reasons for giving approval are:

1. On the basis of the proponent's Environmental Assessment and the Review, the proponent's conclusion that, on balance, the advantages of this undertaking outweigh its disadvantages appears to be valid.
2. No other beneficial alternative method of implementing the undertaking was identified.
3. On the basis of the proponent's Environmental Assessment, the Review and the conditions of approval, the construction, operation and maintenance of the undertaking will be consistent with the purpose of the Act (section 2).
4. The Government Review Team has indicated no outstanding concerns that can not be addressed through conditions of approval. The public review of the Environmental Assessment did not identify any outstanding concerns which can not be addressed through these conditions of approval or conditions of a Provisional Certificate of Approval.
5. The submissions received after the Notice of Completion of the Review was published are being dealt with through conditions where appropriate or raise issues beyond the scope of the Environmental Assessment or the Review. I am not aware of any outstanding issues with respect to this undertaking which suggest that a hearing should be required.

Dated the 18th day of June 1998
at TORONTO..

Tom W. Frie

Minister of Environment and Energy
135 St. Clair Avenue West
15th Floor
Toronto, Ontario

Approved by O.C. No. 1704/98

Attachment A

HIGHWAY 407/TRANSITWAY
(MARKHAM ROAD EASTERLY TO HIGHWAY 7 EAST OF BROCK ROAD)

Environmental Assessment Act

Conditions of Approval

DEFINITIONS

1. For the purpose of these Conditions:
 - a) "proponent" means The Ontario Ministry of Transportation, also known as MTO;
 - b) "MOE" refers to the Ministry of the Environment.

GENERAL REQUIREMENTS

1. The proponent shall comply with all the provisions of the Environmental Assessment as submitted by the proponent which are hereby incorporated in this approval by reference, except as provided in these conditions and as provided in any other approvals or permits that may be issued.
2. These conditions do not prevent more restrictive conditions being imposed under other statutes.
3. Where a document is required for the Public Record, it shall be provided to the Director of the Environmental Assessment Branch for filing with the Public Record file maintained for the undertaking. In addition, copies of all such documents will be provided by the proponent for public access to the Director, Central Region, MOE, the Clerks of The Corporation of the Town of Markham, The Corporation of the Town of Pickering, The Regional Municipality of Durham and The Regional Municipality of York; and at least one local library in each of Markham and Pickering. Such documents will also be provided to other municipalities as considered appropriate by the proponent.
4. The proponent shall publish notices in local newspapers advising of the availability of the Design and Construction reports and any reports prepared under Condition 3.

Specific Requirements

5. During the design phase, in addition to the two public consultation sessions detailed in the Environmental Assessment, the proponent shall provide opportunities such as Focus Group Sessions or Technical Workshops that will allow special interests and the general public to have direct input to the design. Formal notification of such opportunities shall be provided in local newspapers.
 6. The proponent's Design and Construction reports are required for the Public Record. In addition, these reports will be made available to all federal, provincial and municipal agencies that have indicated an interest in being involved in the detailed design phase of the undertaking. This includes, but is not limited to, the Department of the Environment, Department of Fisheries and Oceans, Department of Transport, the Ministry of Natural Resources, the MOE, the Ministry of Citizenship, Culture and Recreation, the Toronto and Region Conservation Authority, the Rouge Park Alliance, and the appropriate planning and/or public works departments of the municipalities named in Condition 3.
 7. MTO shall submit Design and Construction reports to the Director of the Central Region Office of the MOE a minimum of 45 days prior to the commencement of construction.
 8. MTO shall address, through the Stakeholder Consultation Process committed to in the Environmental Assessment, the specific comments of:
 - a) the Toronto and Region Conservation Authority and the Rouge Park Alliance, as laid out in their letters to the Environmental Assessment Branch of June 5, 1997 and February 13, 1998;
 - b) the Ministry of Natural Resources, as laid out in their letters to the Environmental Assessment Branch of June 6, 1997 and February 13, 1998;
 - c) The Corporation of the Town of Pickering, as laid out in their letter to the Environmental Assessment Branch of February 16, 1998; and
 - d) the Noise Assessment Unit of the MOE.
- MTO shall provide a notice to each of the above organizations, setting out how their comments were addressed. A copy of each notice is required for the Public Record.
9. The proponent has committed to a process to allow it to address the environmental impacts resulting from this undertaking, whether specified in the Environmental Assessment or the MOE Conditions of Approval or identified during subsequent stages of design. Therefore, all component projects of this undertaking will be screened by the

proponent during their design for significant new concerns and compliance with commitments made.

Where significant changes in the undertaking, the commitments made, or the effects of the undertaking, with mitigation, are identified as being limited to the interests of specific property owners or other stakeholders, the proponent will work directly with these stakeholders to address and resolve concerns. Where concerns are addressed to the satisfaction of the stakeholders, this will be documented in the associated Design and Construction Report. Where significant changes are identified and the agreement of the stakeholders cannot be reached through consultation, or it is apparent that not all interested parties can be identified without a formal notice process, the MOE will be consulted. MTO and the MOE will make a joint decision on the need to proceed under a Provincial Highways Class Environmental Assessment process to obtain approval under the *Environmental Assessment Act* for the proposed change.

If it is determined that the Provincial Highways Class Environmental Assessment process will be followed, only the change or changes that necessitated this decision will be subject to the review and "bump-up" provisions of the *Provincial Highways Class Environmental Assessment*.

10. The MTO will abide by the objectives/future commitments identified in Section 3.4 of the Environmental Assessment and revised by letter from Paul Jankowski, Project Director MTO to B. Johnston, Assistant Director, Environmental Assessment Branch, MOE, dated August 26, 1997.
